

Biographical Sketch

Professor Dr. Nasrallah M. Deraz is Professor of Advanced Nanomaterials Chemistry and Catalysis at National Research Centre, Dokki, Cairo, Egypt. He received B. Sc., M.Sc. and Ph.D. degrees in Physical Chemistry (Solid State, Surface Chemistry and Catalysis) in 1990, 1996 and 1999, respectively, from College of science, Zagazig University, Egypt. However, he received B. Law in 2005 from College of Laws, Zagazig University, Egypt. He joined Physical Chemistry Department, Laboratory of Surface Chemistry and Catalysis, National Research Centre, Dokki, Cairo, Egypt, since 1992 till now. He was awarded a Post- doctoral fellowship in 2004 to Institute of Materials Science, Structure Research, Darmstadt University of Technology, Germany. He joined Chemistry Department, King Saud University, Riyadh, Saudi Arabia, since 2009 till 2013.

Professor Deraz's research focuses on various aspects of solid state, surface chemistry and catalysis. One topic of research is solid-state chemistry and nano-structured materials. The second topic is surface chemistry and heterogeneous catalysis. The third topic is science and technology of advanced nano-materials.

Deraz has published more than 80 papers in refereed journals. He has supervised M.Sc. and Ph.D. thesis in Egyptian universities. He is a member of the various scientific societies. However, he is reviewer and member of editorial board for different international scientific journals. In addition, Deraz's papers had cited in many papers in different journals. Also, h-index: 21 on my citation: <https://scholar.google.com/citations?user=opwwimAAAAAJ&hl=ar>

Prof. N. Deraz

SELECTED PAPERS

1. Deraz N. M. (2001), Surface and catalytic properties of Cu/Zn mixed oxide catalysts, *Colloids and Surfaces A*, 190, 251-260.
2. Deraz N. M. (2001), Effect of Ag₂O doping on surface and catalytic properties of cobalt-magnesia catalysts, *Materials Letters*, 51, 470-477.
3. Deraz N. M. (2001), Effect of MgO addition on the surface and catalytic properties of the CuO/Al₂O₃ system, *Adsorption Science and Technology*, 19, 2, 131-141.
4. Deraz N. M., Mohamed Heikal and Hamdy El-Didamony (2002), Effect of various superplasticizers on the textural properties of silica fume – pozzolanic cements, *Adsorption Science and Technology*, 20, 5, 453-466.
5. Deraz N. M. (2002), Surface and catalytic properties of Co₃O₄ -doped CuO/Al₂O₃ catalysts, *Colloids and surfaces A*, 207, 197-206.
6. Deraz N. M. (2003), Catalytic oxidation of carbon monoxide on pure and zinc oxide doped nickel-alumina catalysts, *Colloids and Surface A*, 318, 213-223.
7. Deraz N. M. (2008), Production and characterization of pure and doped copper ferrite nanoparticles, *Journal of Analytical and Applied Pyrolysis*, 82, 2, 212-222.
8. Deraz N. M., Selim M.M. and Ramadan M. (2009), Processing and properties of nanocrystalline Ni and NiO catalysts, *Materials Chemistry and Physics* 113, 269-275.
9. Deraz N. M. and Shaban S. (2009), Optimization of catalytic, surface and magnetic properties of nanocrystalline manganese ferrite, *Journal of Analytical and Applied Pyrolysis*, 86, 173-179.
10. Deraz N. M., Aiashy M. K. and Ali S. A. (2009), Novel preparation, magneto-chemical characterization and catalytic behavior of nanocrystalline cobalt ferrite catalysts, *Adsorption Science and technology*, 27, 8, 803-816.
11. Deraz N. M. (2010), Size and crystallinity-dependent magnetic properties of copper ferrite nano-particles, *Journal of Alloys and Compounds*, 501, 317-325.
12. Deraz N. M. (2011), Fabrication and characterization of magnetic alumina-doped zinc ferrite nanoparticles, *Journal of Analytical and Applied Pyrolysis*, 91, 48-54.
13. Deraz N. M. (2012), Effect of NiO content on structural, surface and catalytic characteristics of nano-crystalline NiO/CeO₂ system, *Ceramics International* 38, 747-753.
14. Deraz N. M. (2012), Magnetic behavior and physicochemical properties of Ni/NiO nano-particles, *Current Applied Physics*, 12, 928- 934.
15. Deraz N. M. (2013), Structural and Morphological Characteristics of Copper-Alumina Nano-Composite, *International Journal of Electrochemical Science*, 8, 4, 5213 - 5222.
16. Deraz N. M., Abd-Elkader O. H. (2015), Structural, Morphological and Magnetic Properties of Zn_{0.5}Mg_{0.5}Fe₂O₄ as Anticorrosion Pigment, *International Journal of Electrochemical Science*, 10, 9, 7138 – 7146.
